DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over US PAT 6,810,359 to Sakaguchi in view of US PAT 6,687,634 to Borg.

As to claims 1,9,10 Sakaguchi discloses a computer implemented method (col 2, lines 25-26, brief description of fig 2) comprising diagnosing existing conditions of equipment (col 2, lines 62-65) to determine if any repairs are required to bring the equipment up to a predetermined standard (col 3, lines 8-11) negotiated between the owner and the provider (inherent in that the provider agrees to keep the equipment up to industry standards), repairing the equipment up to the standards (col 3, lines 12-15), developing a maintenance schedule to perform recurrent inspections (fig 2, inspections standards data), preventative maintenance (col 3, line 63-col 4, line 2), and

Application/Control Number: 09/935,843

Art Unit: 3629

housekeeping (col 3, lines 23-26). It would inherently be performed for a specified time (for as long as the owner of the equipment was paying for the service).

Sakaguchi does not, however, teach providing a warranty.

It is very well known in the art to provide service contracts to guarantee services rendered.

Borg discloses a method of monitoring and maintenance for products (title) that ensures that equipment is up to industry standards (26, 28,30,32,34) bringing the equipment up to those standards if they are not met (38) and using this for a service contract provider (col 5, lines 39-41). It would have been obvious to one of ordinary skill in the art to modify the system as disclosed by Sakaguchi with the service contract as disclosed by Borg as Borg shows this to be a good way to ensure warranty compliance.

As to claim 2, Sakaguchi discloses inspecting the site where the equipment is located (col 3, lines 23-26, it would be inherent that the location was inspected as Sakaguchi discloses identifying places where dust or oil would be generated or leaked).

As to claim 3, Sakaguchi discloses interviewing the owner or manager of the equipment (inherent in that the owner or manager must be consulted prior to work is done on their equipment).

As to claim 4, Sakaguchi discloses generating a report on the results of the diagnosing step (fig 2).

As to claim 5, Sakaguchi discloses inputting and analyzing results (fig 2).

As to claim 6, Sakaguchi discloses recommending repairs (col 6, lines 40-49).

Sakaguchi does not, however, teach providing cost estimates. It is very well known in the art to provide cost estimates for prospective work. Therefore, it would have been obvious to one of ordinary skill in the art to modify the system as disclosed by Sakaguchi in view of Borg by providing cost estimates so the owner of the equipment could evaluate if it is cost-effective to perform the work. For instance, if the cost estimate is more than the cost of replacing the equipment, it would not be cost-effective.

As to claim 7, Sakaguchi discloses adjusting the maintenance schedule in view of the inspection (col 7, line 17- col 8, line 25).

As to claim 8, Sakaguchi discloses a step of inputting results of the inspection step (col 7, lines 17-21).

As to claims 11,13,15, it would be obvious to one of ordinary skill in the art to transfer 100% of the risk as a warranty is known to transfer the risk from the owner.

As to claim 12,14,16, it is very well known to exclude these from warranty risks.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael J. Fisher whose telephone number is 571-272-6804. The examiner can normally be reached on Mon.-Fri. 7:30am-5:00pm alt Fri. off.

The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
